RATING SYSTEM

RECOMMENDED

The results for this specific chemotherapy drug suggest that the glove would provide an adequate barrier for use in most applications. Breakthrough occurs in >60 minutes.

CAUTION

The results require additional consideration to determine suitability for use. Breakthrough occurs in >10 to 60 minutes.

NOT RECOMMENDED

Not recommended for use. Breakthrough occurs in ≤10 minutes.

IMPORTANT: ASTM D6978 testing performed by a third-party accredited laboratory. Stated breakthrough times were determined under laboratory conditions that may not reflect actual usage. Variation in the environment or a mix of chemotherapy drugs used may impact breakthrough times. Users should test the suitability of this product against their specific chemotherapy drugs and environment.

GAMMEX® Innovation that Protects

Driven by innovation, GAMMEX® surgical gloves are engineered to respond to the evolving user needs of the surgical community. Featuring unique formulations and cutting-edge technologies, ergonomic comfort and superior protection, healthcare workers around the world entrust their hands to ours.
