Yellow Badges

Researchers have determined that yellow badges featuring black text provide the highest level of readability and optimal colour contrast.

This finding is particularly beneficial for individuals with visual impairments and dementia.

Elastic Back Hats

These hats are elasticated at the back to enable all the hair to be tucked in.

Sizes:

Circumference of head:

Small: 55-63cm

Medium: 58-66cm

Large: 64-72cm

X Large 65-73 cm (for larger volume of hair)

A larger hat may be required when measured against the circumference of the head to account for longer and thicker hair lengths.

Hammock Hats

The hammock hat is perfect for very long, thick hair.

Rather than needing to wear the hair up tightly, which can pull on the follicles, the hammock gently cradles the hair whilst the ties make it feel secure.

Braided Hat-Medium

- The medium braided hat holds long, thin hair braids.
- This is a larger version of the hammock; it cradles the hair gently and holds long, thin hair braids comfortably.
- You can also tie this hat to enable a secure fit.

Braided Hat-XL

- The large braided hat holds long, thick hair braids.
- This is a larger version of the regular braid hat; it cradles the hair gently and holds a large volume of thick hair braids.
- You can also tie this hat to enable a secure fit.

Bandana

- One size fits all bandana.
- Unisex but usually worn by men because of having typically short hair.
- No elastic to tuck the hair into.
- The bandana ties at the back to ensure a secure fit.
- The fold at the front and side of the bandana can adjust to fit the size of the wearer's head.

Hoods (over-the-shoulder)

- Usually worn in orthopaedics.
- Provides maximum coverage for head and shoulders.
- Sizes: Medium / large / XL
