

Kliniderm® Foam Silicone Border Flexible

Advanced Wound Care with Proven Clinical Performance

Introducing Extra Flexibility for Better Healing

Kliniderm Foam Silicone Border Flexible is the latest innovation in Mediq's Klinion Wound Care range. It is designed for low to moderately exuding wounds and features unique Z-shaped cuts. Kliniderm Foam Silicone Border dressing offers superior flexibility and secure adherence—making it ideal for use in high-movement areas and challenging anatomical sites.

Clinically Proven Performance

In a 2025 clinical evaluation, Kliniderm Foam Silicone Border Flexible was compared against a leading competitor¹. The evaluation demonstrated excellent clinical outcomes, strong dressing performance, and high patient satisfaction across a range of wound types:

84%	Of patients would switch to Kliniderm Foam Silicone Border Flexible
77%	Rated overall comparability as excellent
96%	Praised its flexibility
97%	Reported no pain on removal
93%	Patient comfort rating

Key Benefits

Extra flexibility

Unique Z- shaped cuts that allow for a more flexible dressing and greater extensibility

Absorbs and manages exudate

To protect surrounding skin and support moist wound healing

Skin friendly

Reliable fixation and safe for fragile skin, improving patient compliance

Effective under compression

Absorbs under compression bandages and hosiery

Gentle silicone adhesive

Helps minimise the risk of pain and damage to the wound at dressing changes

Up to 7 days wear time

To minimise dressing changes

Protective

Providing a barrier for microorganisms

Indications

Kliniderm Foam Silicone Border Flexible is suitable for use throughout the healing process on:

- Pressure ulcers
- Donor sites
- Venous leg ulcers
- Postoperative surgical wounds
- Diabetic foot ulcers
- Superficial and partial thickness burns
- Lacerations, abrasions, skin tears
