

Indications

Kliniderm Foam Silicone dressings are indicated for low to moderate exuding wounds and may be used throughout the healing process on pressure ulcers, venous leg ulcers, diabetic foot ulcers, lacerations, abrasions, skin tears, donor sites, postoperative surgical wounds, superficial and partial thickness burns. They are also suitable for use under compression bandaging.

Kliniderm Foam Silicone Lite is indicated for wounds with a low volume of exudate while Kliniderm Foam Silicone can be used on wounds with a low to moderate exudate volume.

	LOW	MODERATE
Management aims	Manage exudate Protect surrounding skin
