DOUBLE GLOVE ONE DON DONE™

GAMMEX® PI Plus Glove-in-Glove™ System

GAMMEX®

PRE-DONNED GLOVE-IN-GLOVE, READY FOR DOUBLE GLOVING

Experience double gloving convenience like never before. Ansell's patent-pending GAMMEX® PI Plus Glove-in-Glove™ System delivers a world first: pre-donned outer and inner synthetic surgical gloves ready for double gloving in just one don.

Don in half the time. Don once and you're done! It's that simple and it takes just seconds from un-wrapping to donning.

Reduces environmental impact. By combining the glove-in-glove pairs in one poly-pouch and one inner-wrap, there is 50% less waste with inner packaging, so you further increase your contribution to the environment.
